

Your team gitbut URL

where your project and review are:

<https://github.com/zixuan0738/MA615---Mapping-Assignment>

The github URL for the project you reviewed

Where you got the project to review:

https://github.com/minqil/mapping_team7

Does the code run?

Yes

We can run the code and see the outcome.

How many maps are produced?

4

Comparison to Hurricane Exposure maps

M1(0-10), M2(0-10), M3(0-10), M4(0-10)

M1: 10

M2: 10

M3: 10

M4: 9

Did your team include new code in your review?

No, we did not.

The code produces 4 maps that are required. However, we have deducted one point for map 4 because the 'title' on the bottom right should be edited. Right now it is just 'Rainfall', and you should edit this to "Rainfall > 175mm" so it will make sense. To be specific, this is due to line 183 in your code that you put 'Rain > 175 mm' after 'col=' rather than 'title = '.

Lastly, it would be better that you can add more detailed comments about your codes. It has quite simple comments, so if you add more comments, then it would be easier to follow your codes. Rather than these, all of your work is great.

We hope this can be helpful.
